Full-Stack Developer with 2 years of experience building scalable, data-driven web applications using **React, Next.js, Node.js, Express, and MongoDB**. Proven experience integrating **AWS S3** for high-performance data ingestion, optimizing data workflows, and designing user-friendly interfaces for productivity-focused tools. Strong background in delivering end-to-end features, collaborating with users for real-time feedback, and building reliable, production-ready systems.

Technologies and Languages

- **Frontend:** React, Next.js, TypeScript, Redux, Tailwind CSS, HTML, CSS
- **Backend & Database:** Node.js, Express.js, MongoDB, Prisma, RESTful APIs, AWS S3, Socket.io, WebRTC, MongoDB, PostgreSQL
- **Tools & Practices:** Git, GitHub, Testable Code, Clean Architecture, UI/UX Design, Claude, Cursor, ChatGPT, GitHub Copilot

Work Experience

Full Stack Developer	Clutterbot	Nov 2023– Dec 2025
• Integrated AWS S3 to enable direct data ingestion into the Data Annotation platform, improving data access speed and reducing manual setup. • Optimized data handling and redesigned UI flows to create a more user-friendly annotation experience and improve annotator efficiency. • Collaborated closely with the annotators' team to gather real-time feedback and iteratively improve product usability. • Built and enhanced features focused on productivity, performance, and workflow optimization across the platform.		

Projects

Learning Management Platform	Live Demo
• Built a full-stack LMS with secure role-based access for students and admins. • Admin: Responsible for creating and managing courses, as well as viewing and tracking student progress across different courses. • Student: Can access the platform to view available courses, track individual learning progress, and mark courses as completed. • Technologies: Next.js, React, MongoDB, NextAuth.js, Tailwind CSS, Vercel	

WatchParty	Live Demo
• WorkParty is a real-time watch-party app that lets users create private chat rooms and invite friends. • Users can stream and enjoy movies or videos together while communicating through live chat, providing a synchronized and interactive group-watching experience. • Technologies: Next.js, React, TypeScript, Socket.io, Prisma, PostgreSQL, WebRTC, Vercel	

Education

- **Bachelor of Science-** Indian Institute of Technology, Jodhpur (2020 - 2023)
