PROFESSIONAL SUMMARY

Results-driven **Full-Stack Developer** with **1.6 years** of production experience shipping scalable, data-driven web applications used by real teams. Expert in **React 18, Next.js 14, TypeScript, Node.js, MongoDB, and PostgreSQL** with hands-on experience in real-time systems (Socket.io, WebRTC), cloud infrastructure (AWS S3), and CI/CD automation. **IIT Madras graduate (B.S. Data Science)**. Delivered 15+ end-to-end production features at a SaaS startup. Seeking a **Full-Stack / Frontend / Backend** role where I can contribute to a high-growth global team.

TECHNICAL SKILLS

Frontend:	React 18, Next.js 14, TypeScript, Redux Toolkit, Tailwind CSS, HTML5, CSS3, React Hooks, Context API, React Query, Zustand
Backend & APIs:	Node.js, Express.js, REST APIs, GraphQL, Socket.io, WebRTC, WebSockets, JWT, NextAuth.js
Databases:	MongoDB, PostgreSQL, MySQL, Prisma ORM, Mongoose, Redis (basic)
Cloud & DevOps:	AWS S3, Vercel, Netlify, Git, GitHub, CI/CD Pipelines, GitHub Actions, Docker (basic)
Testing & Other:	Jest, React Testing Library, Vitest, Agile/Scrum, Code Review, UI/UX Principles, Figma

WORK EXPERIENCE

Full Stack Developer	Clutterbot (SaaS Data Annotation Platform)	May 2024 – Dec 2025
- Architected AWS S3 direct-upload integration for the annotation platform, eliminating manual upload steps and cutting data-setup time by ~50%, enabling seamless batch ingestion of large-scale datasets. - Designed and shipped 15+ production features (React 18 + Node.js) focused on performance, scalability, and workflow automation — code consistently reviewed and merged with zero regression incidents. - Optimized annotation UI task flows, reducing annotator time-on-task by an estimated 20% and measurably increasing team throughput across 10+ concurrent annotators. - Ran bi-weekly product feedback cycles with 10+ annotators, translating user insights into 6+ shipped workflow improvements per quarter, directly lifting usability scores. - Maintained 95%+ uptime across the full stack by implementing error boundaries, retries, and CI/CD pipelines with automated GitHub Actions deployment to Vercel.		

PROJECTS

Learning Management Platform (LMS)	Live Demo GitHub
- Built a full-stack LMS with role-based access control (Admin / Instructor / Student), JWT auth via NextAuth.js, and real-time course progress tracking for concurrent learners. - Achieved sub-2s page loads and 90+ Lighthouse score using Next.js 14 SSR, MongoDB indexing, and Tailwind CSS; deployed on Vercel with CI/CD pipeline. <i>Tech: Next.js 14, React 18, TypeScript, MongoDB, NextAuth.js, Tailwind CSS, Vercel, GitHub Actions</i>	
WatchParty — Real-Time Video Sync App	Live Demo GitHub
- Engineered WebRTC P2P video streaming with Socket.io real-time chat, supporting 20+ concurrent users per room at under 200ms latency. - Implemented PostgreSQL + Prisma schema for user sessions, room lifecycle, and message history; full end-to-end TypeScript type safety across client and server. <i>Tech: Next.js 14, React 18, TypeScript, Socket.io, WebRTC, Prisma, PostgreSQL, Vercel</i>	

EDUCATION

B.S. in Data Science & Programming	Indian Institute of Technology (IIT) Madras
<i>IIT Madras — India's #1-ranked engineering institution (QS Asia Top 50). Coursework: Data Structures & Algorithms, Database Systems, Machine Learning, Statistics.</i>
